02 March 2018

Profile

Data	Development	Database	Operations
Statistical Analysis	Linux	SQL/NOSQL	Task Automation
Visualizations	Git/Github	Data Warehousing	Excel
Data Wrangling	R/Rstudio	Dashboards	Reporting

Work History

Data Scientist I - Source Intelligence 2014-2018

Collaborate with Development/Operations teams to create projects that build value through data science. Tasks included algorithm development, statistical testing, experimental design, dashboard creation using R language (rstudio::shiny) and task automation for repetitive work. Wrangle data from many sources to model ready data. Created data science pipelines from customer generated data through branded repeatable reports. Wrote and executed SQL queries and stored procedures. Create and maintain data APIs. Communicate data and statistical results to executive team using approachable language for easier decisions. Code samples available on request.

Production Operator - Nexus Dx/Samsung Electronics 2012-2013

Implemented 5-S - Lean inventory management. Implemented 5-S shipping and receiving procedures. Acted as primary buyer and planner to meet forecasted demand (MRP). Implemented enterprise resource planning (ERP) software as part of a multi-department team. Performed statistical analysis of raw materials, processes and cycle times. Developed and implemented process improvements. Implemented GMP processes, drafted manufacturing SOP's and work instructions. Participated in internal and external audits including ISO. Supervised a team of 10+ assemblers to meet manufacturing deadlines. Set-up manufacturing equipment and process flow. Calibrated and maintained manufacturing equipment. Completed and reviewed batch records.

Pet Training Instructor - PetSmart 2009-2011

Teach organized classes of 10-30 people pet training techniques that use positive reinforcement to alter dogs behavior. Teach private one-on-one lessons to help owners and pets live better lives together. Interacted with customers to find the best solution for their pets behavior. Scheduled pet training classes in coordination with other trainers to maximize time available for sales and training.

Hospital Corpsman - United States Navy 2004-2009

Maintained inventory of consumable and durable medical supplies for use in trauma care setting valued in excess of \$75, 000. Member of trauma care team including forward surgical suite and shock/trauma team. Created and maintained documentation of patient care in computerized health records. Managed patient evacuation out of theater of operations during Operation Iraqi Freedom in Al Anbar Province, Iraq.

Education

Graduate Certificate in Applied Statistics

Pennsylvania State University 2014-Present

Applied statistics, statistical programming, model selection and development, experimental design, reproducible research.

Bachelor of Science

Environmental Health Trident University International 2007-2011

Relevant coursework includes, Microbiology, Environmental Health & Safety, Hazardous Materials Safety, Water Quality and Wastewater Management.

Associate of Science

Biotechnology Research & Development MiraCosta College 2009-2012

Knowledge and skill training for competent and compliant technical laboratory work, including solution and media preparation, sterile technique, bacterial culture, mammalian cell culture, protein purification using liquid chromatography, protein assays, gel electrophoresis, recombinant DNA techniques, and documentation (SOPs, batch records, notebooks). Other coursework includes chemistry, biostatistics and business and regulatory practices in biotechnology. Algae cell culture, biochemistry of various biofuel producing organisms, oil extraction and purification techniques. Lab notebook sample available upon request.
